Violin

The violin is a type of string instrument that can be played by vibrating its four strings with a bow. Although its origin and creator are not clearly known, it was used as a popular instrument that provided musical accompaniment for dancing until the mid-16th Century. Soon, it turned into an indispensable instrument playing the central role in orchestras thanks to the development of fabrication technology and the change that occurred in the musical preference of people. If a high-quality violin is appropriately taken care of, its performance and value are considered to become even better over time. Among the expensive violins, those made by Nicola Amati, Antonio Stradivari, and Giuseppe Guarneri are appreciated even today as "works of art".

■ Parts sheet [Pattern] : Sixteen A4 sheets

■ No. of Parts: 242

※ When assembling the parts, be sure to carefully read the "Assembly Instructions" along with the parts sheet.
※ This model was designed for Papercraft and may differ from the original in some respects.
